Connecting the world's real-time information

**Amphora is a leading storage, integration
& collaboration platform.**

AMPHORA DATA

Simplify your integration with Amphora Data

| Value	How we do it
Time saved on integrating data	• We reduce the number of integrations and APIs you deal with to **one.** • We use modern APIs and have SDKs in python, node.js and .NET. • We handle all the ETL jobs and data infrastructure.
Data is ready for your software	• All data on Amphora is machine readable, ready for you to use. • Each dataset has transparent metadata (quality, date, size etc) so you know what you are getting.
Migration is free	• We offer a free service to migrate any data feed you want into Amphora with our Team or Institution plans. • Get the benefits from simpler integration without any upfront costs

Amphora delivers value to your organisation

AMPHORA DATA

Transition to Amphora with our free migration service

Request migration

- Sign up with either the **Team** or **Institution** plan
- Identify the list of data feeds you want migrated
- Submit the list with **Data Request** on the web application

We migrate feeds

- We set up and maintain ETL for data feed
- Receive notification that your data is ready
- Data is on Amphora Data ready for you to use

Enjoy your data

- Access your data from the specified Amphora
- Enjoy using a single API and integration channel to access the data that you need

You must have access to data already, we will pass through any direct costs of the data, fair use applies

We have the right plan for every need and budget

Plan	Monthly subscription	Most suited for	Top features		Max. users	Max. total file size
Individual	**Free**	**Individuals** **Start ups**	• Find and use 3rd party data • Share your data • Access to public data repo. • Unlimited data downloads • Personal dashboard	• Custom terms of use • Custom access rules • SDKs and sample code • Docs and online tutorials • Community support	1	10GB
